

LIABILITY.

It's no game.

Outdated bleacher rails could be all that stand between your school and potential accident liability. Virtually all rails on bleachers installed before 1996 fail to meet current safety code requirements (IBC 2003). It's time to call in a replacement.

New Hussey omni-rails bring older bleachers up to date, meeting code requirements and maintaining visibility from the stands. Hussey rails help keep your spectators safe and significantly reduce your liability risk. Replacement is fast, easy and cost-effective, so everyone wins...

And because our rails are designed and engineered to OEM standards, they fit any Hussey Bleacher model.

PLAY IT SAFE

with new bleacher rails.

Protect your spectators and your school. Call now for information on replacing your bleacher rails:

1-800-353-3308.
